

The Field Trip That Comes to You

NGSS-Aligned Global Biodiversity
Virtual Reality Expeditions

Hassle-free, No buses, Zero teacher prep.
Only \$5 per student.

Chicago's STEM Crisis

Only 25% of students meet Science standards.

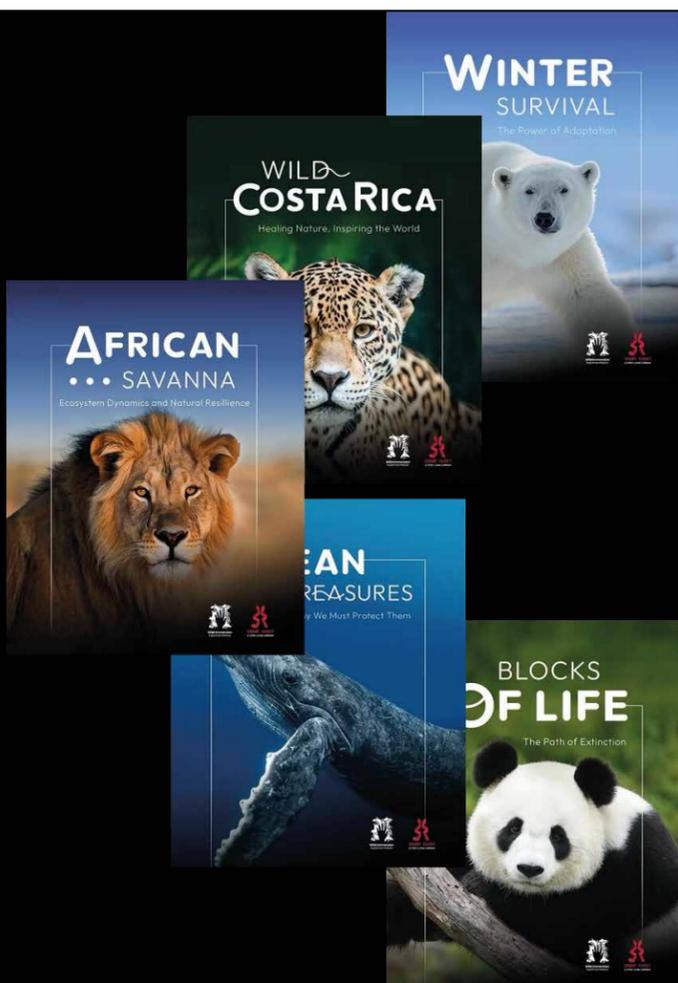

As engagement plummets and teacher burnout peaks,
the status quo is failing. This isn't just a proficiency gap, it's a crisis of inspiration.

Source: Illinois State Board of Education (ISBE), Illinois Report Card 2023-2024. Science Proficiency Rates for Chicago Public Schools (District 299).

We solve this crisis by turning science into a 'living memory.'

By eliminating distractions and leveraging how the brain naturally learns,
we ensure far greater retention than traditional reading.

Over 120,000 students have already transformed their learning with us.

Empower your students with
the world's largest
Virtual Reality biodiversity library.

9 immersive experiences.

* Next Generation Science Standards Aligned.

* Full Exploration: From animal structure and function
to the flora-fauna relationship, ecosystem dynamics,
human impact, and natural resources..

Hassle-free for teachers:

- We bring, install, and manage everything.
- No buses, no field trip permits, no risks.

Safety

- Age-appropriate content only
- Controlled “walled garden” environment
- Trained facilitators supervising at all times

Capacity & Operational Model:

- Dynamic group sessions.
- Led by professional facilitators.
- Zero disruption to the school schedule.

Thanks to our rotation model, we can accommodate **100 students per hour** with total order and safety.

Immersive science from just \$5 per student.

 1 EXPERIENCE  \$5	 2 EXPERIENCES  \$8	 3 EXPERIENCES  \$10
---	--	---

Jason,
Fourth Grade.

"There were no distractions; every student was completely immersed in science".

Sarah,
Sixth Grade.

"It was as if my students had a superpower: they were right there among turtles and sharks."

Jessica,
First Grade.

"Even my shyest students wouldn't stop talking about science."
